

An Introduction to Attribution Processes Psychology Revivals

A Comprehensive Guide to Understanding How People Explain Behavior

Attribution theory is the psychological process by which people explain the behavior of others. We all make attributions every day, often without even realizing it. When we see someone do something, we automatically try to figure out why they did it. We might attribute their behavior to their personality, their intentions, or the situation they're in.

An Introduction to Attribution Processes (Psychology Revivals) by Kelly G. Shaver
