## Chapter 1: Delving into the World of Manuscript Writing

Embark on an extraordinary journey into the realm of manuscript writing. This chapter will introduce you to the fundamentals of this captivating craft, providing a clear understanding of what a manuscript is, its various types, and the essentials of effective writing.

## Chapter 2: Crafting a Compelling Story Structure

Uncover the secrets of a gripping narrative. This chapter delves into the anatomy of a successful story, guiding you through the creation of a captivating plot, engaging characters, and a satisfying resolution.

# Elements of a Story

Every well-written story includes these five essential elements:

Visualize the building blocks of a compelling story.

## Chapter 3: Mastering the Art of Character Development

Bring your characters to life with depth and authenticity. This chapter explores the techniques for creating relatable and unforgettable protagonists, crafting compelling antagonists, and building dynamic relationships.

## **Chapter 4: Unlocking the Power of Vivid Description**

Transport your readers to the heart of your world. This chapter provides insights into crafting vivid descriptions that evoke sensory experiences, create immersive settings, and leave a lasting impression.

Painting a picture with words.

## **Chapter 5: The Secrets of Effective Dialogue**

Ignite conversations that drive your narrative forward. This chapter reveals the techniques for writing natural, engaging, and scene-building dialogue that brings your characters to life.

## **Chapter 6: The Ultimate Guide to Manuscript Formatting**

Prepare your manuscript for success with professional formatting. This chapter provides a comprehensive guide to industry-standard formatting guidelines, ensuring your manuscript meets the expectations of publishers and agents.

## Title of the Manuscript

Ann Smith<sup>1</sup>, John K. Jackson<sup>1</sup>, Peter Ray<sup>2</sup>

<sup>1</sup>Some University, Department of Some Field,  
100 Some Road, City, Province, Country PostalCode  
smith@someuniversity.edu; jackson@someuniversity.edu  
<sup>2</sup>Another University, Department of Something  
44 Some Street, City, Province, Country PostalCode  
ray@anotheruniversity.com

**Abstract** - The abstract needs to briefly describe the manuscript, including its objectives, findings, and significance. It should be formatted with 10 pt Cambria and justified. The abstract should be no more than 150 words and no less than 100 words. As much as possible, references and equations should be avoided in the abstract. There is five keywords, appointed by commas (in shows below) should follow the abstract. There are key words that capture the essence of the manuscript. Only the first keyword should be capitalized. A title precedes the abstract. The title is 12 pt bold and centered. Author names follow the title in 12 pt bold. Centered, followed by affiliation (University name, department, address, and zip) in 10 pt Cambria.

**Keywords:** Maths, Models, Numerical models.

### 1. Introduction

An introduction follows the keywords. The introduction should provide a clear indication of what is put forth in the manuscript. A background on the topic should first be provided. Then the problem and importance/significance of the problem in the field should be clearly described, followed by an overview of the solution/contribution provided in the manuscript.

### 2. Related Work

It is preferred that the related survey be separated from the introduction section. Therefore, a designated section is used. However, it is completely acceptable for the related work section to be merged with the introduction. Citation and referencing follows the IEEE style with two minor modifications.

Received: 2014-06-24

merged with the introduction. Citation and referencing follows the IEEE style with two minor modifications.

- 1) In the References section, the IEEE style uses "et al" when three or more authors are available; we DO NOT use this rule in other words in the Reference section; all authors need to be mentioned for each manuscript.

- 2) In the references section, the IEEE style abbreviates/shortens the names of journals or conferences; we DO NOT use this style. Otherwise our citing and referencing method is similar to the IEEE style. Abbreviating articles in the body of the manuscript, volume numbers such as [1], [2], in the order to which they are mentioned in the text. Following is an example of how references should be cited in the body of the manuscript: while analytical models are often used for this purpose [1]-[5], Jones et al. [1] have illustrated that numerical models are also accurate means for approximating such systems.

### 3. Formatting Guidelines

The MS Word document must use Letter size paper with 2.54 cm top and bottom, and 1.27 cm left and right margins. A two column format is used with a width of 9.2 per column with a separation space of 0.59 cm. First lines of new paragraphs are indented by 1 cm. The body text is 11 pt Cambria, single-spaced, without 0 before and after paragraph spacing.

### 4. Headings

Major headings are 12 pt bold Cambria. DO NOT use "auto numbering" for numbering headings or sub-headings. All headings and sub-headings are to be left-aligned.

Navigating the intricacies of manuscript presentation.

## Chapter 7: The Art of Proofreading and Editing

Polish your manuscript to perfection. This chapter offers practical tips and techniques for meticulous proofreading and editing, empowering you to eliminate errors, enhance clarity, and deliver a polished work.

## Epilogue: Embarking on Your Manuscript Journey

Conclude your literary adventure with a wealth of inspiration and guidance. This epilogue provides a roadmap for submitting your manuscript to agents and publishers, navigating the publishing landscape, and embracing the transformative power of writing.
