By Michael Frost

The church is changing. In the past, churches were often seen as places of tradition and dogma. But today, more and more people are seeking out churches that are open to change and innovation. These churches are often referred to as "emerging churches."

In his book *The Deconstructed Church*, Michael Frost provides a clear and concise overview of the emerging church movement. Frost argues that the emerging church is not a new denomination, but rather a new way of being church. Emerging churches are characterized by their focus on mission, their openness to change, and their commitment to community.

Frost also discusses the challenges that emerging churches face. These challenges include the need to balance tradition with innovation, the need to reach out to new people without alienating existing members, and the need to maintain a sense of community in a rapidly changing world.

Despite these challenges, Frost believes that the emerging church movement has the potential to revitalize Christianity. He argues that emerging churches offer a fresh and exciting vision of what the church can

be. If you are interested in the future of Christianity, then you need to read *The Deconstructed Church*.
